Everything you do on Android (and all smartphones) requires an app, whether it's accessing settings, playing games, sending emails or messages, or setting up a reminder. Android users can access many app stores, including Google Play if you have a Samsung device, Amazon Appstore for Android, Galaxy Apps and a number of others - some legible, and some not. One of the most important things to consider before downloading any app on Android is security. Just like a computer, an infected smartphone can cause performance issues, privacy violations, and even loss of your data. Here's how to safely trust your Android and download apps from a variety of sources. These instructions apply to Smartphones and tablets running Android 7.0 Nougat and later. In response to some high-profile security incidents, including malicious apps in the Play Store, Google has rolled out Play Protect, which regularly scans your device for malware. By default, this setting is turned on, but you should check if it is twice. Go to Google Play Protect > Settings > Security & Location and switch to Scan for security threats. Here you can also see the last scanned applications and the time of the last scan. Google Play Protect also scans apps in the Play Store before you download them. If you try to download an app from somewhere other than Google Play using a mobile browser or other app, how much warning will you get that your device won't allow unknown apps to be installed from that source. Go to Settings > Apps > Notifications > Advanced > Custom app access > install unknown apps. You'll see a list of apps that can download apps like Chrome and other mobile browsers. Tap any app you use to download apps and switch from this source to Allow. Be sure that an unknown app can compromise your device. To further protect yourself, go to Improve harmful app detection in the Google Play Protect section of your device's settings. You can use Google Play apps from a desktop browser in addition to your smartphone or tablet. The Google Play Store app is built into most Android devices and is available for some Chromebooks.
